Volume 11, Number 2, February 2016

A Model Driven Engineering Approach to Support the Development of Secure Software as a Service **118**

Pablo Matos, Denivaldo Lopes, Zair Abdelouahab

An Efficient Ensemble Sequence Classifier **133**

I-Hui Li, I-En Liao, Jin-Han Lin, Jyun-Yao Huang

Handling Sparse Data Sets by Applying Contrast Set Mining in Feature Selection **148**

Dijana Oreški, Mario Konecki

Minimizing the Project Cost with Generalized Precedence Relations **162**

Zhi-Xiong Su, Han-Ying Wei, Xue-Min Yu

Optimizing Framework Release Plans Using the Incremental Funding Method **182**

Andre de Souza Andrade, Eber Assis Schmitz, Antonio Juarez Alencar, Alexandre Luis Correa

A Requirements-to-Implementation Mapping Tool for Requirements Traceability **193**

Jorge Esparteiro Garcia, Ana C. R. Paiva

Investigating Vincenti Engineering Principles in Support to the Auditing of Measurement Processes in Agile Organizations **201**

Malik Qasaimeh, Alain Abran, Ammar Abdallah, Raad S. Al-Qassas

A Flowchart for Rapid Technical Debt Management Decision Making **212**

Congyingzi Zhang, Yan Wu
