### Contents

**Guest Editorial**  
*Qihai Zhou and Qiang Liu*  

**SPECIAL ISSUE PAPERS**

1. **New Algorithm for Indefinite Multi-objective Decision Making Based on Multiple-valued Intuitive Fuzzy Set Theory**  
   *Qihai Zhou and Yan Li*

2. **Software Prepromotion for Non-Uniform Cache Architecture**  
   *Junjie Wu, Xiaohui Pan, and Xuejun Yan*

3. **A Reliable Multicast Routing Protocol for High-speed Mobile Ad Hoc Networks: R-ODMRP**  
   *Zhiming Xu, Yu Wang, and Jingguo Zhu*

4. **Remote Sensing Image Sequence Segmentation Based on the Modified Fuzzy C-means**  
   *Gen-yuan Du, Fang Miao, Sheng-li Tian, and Xi-rong Guo*

5. **Multi-Agent Coalition Formation Tactic Based on Grid**  
   *Xin Qi and Jianjian Chen*

6. **The Study of Mathematical Expression Recognition and the Embedded System Design**  
   *Xiangwei Qi and Yusup Abaydulla*

7. **Analysis of LPG Engine PID Parameter Control of Transient Air-fuel Ration Based on Improved Elman Neural Network**  
   *Jubiao Yao, Keyu Jiang, and Chaoyi Yao*

8. **k out of n Oblivious Transfer Protocols from Bilinear Pairings**  
   *Jing Qin and Hua-wei Zhao*

9. **A Pre-Identification Method for Chinese Named Entity Recognition**  
   *Hongjian Liu, Defeng Guo, Quan Zhou, Kenji Nagamatsu, and Qinghua Sun*

10. **On Practice of Big Software Designing**  
    *Lin Yang, Wei Sun, Chi-long Zhao, and Honglei Tu*

11. **Describing the Semantic Relation of the Deep Web Query Interfaces Using Ontology Extended LAV**  
    *Hao Liang, Wan-Li Zuo, and Fei Ren*
